**WELL INVESTIGATION PROGRAM—SUBSURFACE INVESTIGATIONS, ITT
FACILITY, 1200 S. FLOWER ST., BURBANK, CA., (FILE NO. 109.0582)**

Reference is made to your consultant's, Environ, letter dated January 11, 1996, which was in response to our letter dated November 28, 1995, transmitting additional information regarding the site assessment activities to be conducted in and adjacent to buildings 4, 5, 6, 14, 15, 16, and the storage yard located at the above referenced site. We have reviewed the additional information and previously submitted work plan and have no objections to the implementation of the site assessment activities provided that all the work is completed as proposed and complies with all Regional Board Requirements.

Upon the completion of each of the three major tasks, those individual task results must be discussed with this Regional Board prior to undertaking the next Task, as proposed by your consultant. Subsequent to the completion of all task activities, three copies of a technical report containing the results of the site assessment activities conducted must be submitted to this Regional Board.

Please notify Board staff at least 72 hours in advance before commencing any field activities, so we may schedule a representative to be present.

If you have any questions, please contact Ms. Ana Veloz at (213) 266-7590.

A handwritten signature in cursive script, reading "Gregg Kwey".

GREGG KWEY
Senior Water Resource
Control Engineer
